

PARAMA CRM — Complete Feature List

Every feature in the app, with our keep / remove recommendation · 2026-08-18

The app has about 90 features. Most come from the open-source base (Frappe CRM). A few we built for the travel business are marked **C** (Custom). We recommend a simple set for the client. This table lists every feature so you can decide. Change any mark and tell us. "Remove" means hide it, not delete it. We can turn a hidden feature back on later.

KEEP — show it (about 34)

OPTIONAL — show if asked (about 20)

REMOVE — hide for now (about 36)

KEEP core to the demo **OPTIONAL** useful but adds screens **REMOVE** hide to keep it simple **C** = we built it
